ANNOUNCEMENT FOR 1874.

THE Publishers of the Buffalo City Directory, in presenting the volume for the current year, take pleasure in congratulating the citizens of the city upon the continued progress and prosperity shown by the canvass. This volume contains 41,184 names, which on the basis of 4⅛ persons to each name indicates a population of 169,884. We believe the population of the city to be fully ONE HUNDRED AND SEVENTY-FIVE THOUSAND. The average annual increase of population for the past four years has been over thirteen thousand, and there is every reason to expect that this steady and healthy growth will be maintained.

The Directory, it will be observed, contains the usual amount of detailed information in regard to the municipal government and the public, religious, educational, charitable and private institutions of the city.

The typography of this edition will be found fully equal to that of any of its predecessors, and the number of pages is increased to 696—twenty-six more than last year. As a book of reference, it will be found indispensable to every Buffalonian who is engaged in business.

THE PROGRESS OF BUFFALO.

THE canvass made this year for the Buffalo City Directory, shows a steady increase in the population. The number of names now published is forty-one thousand, one hundred and eighty-four. Reckoning by the safe rule that the inhabitants of an American city may be estimated to be four and one-eighth times the number of names included in such a publication as the present, Buffalo now contains a population of at least 169,884. The average yearly addition for the last four years has been over thirteen thousand. There are good reasons for believing that the increase will long be continued in a progressive ratio.

As a place of residence, Buffalo, both socially and from the invigorating salubrity of her climate, is one of the most attractive in the Union. Her churches, schools and public libraries are such as can be found in few other cities. Her streets are well paved and drained, and so wide that whatever may be her future population, there can be no deficiency of light and air in them. With wise forethought a magnificent park and boulevard system has been formed, and is already a source of much pleasure to our people, although its real advantages will be more apparent as the population increases. Rents and the prices of real estate are probably lower than in any other city of its size and prosperity.

In addition to her facilities for transit by water on the lakes and by the Erie canal and Hudson river, to the ocean, Buffalo has long derived important advantages from the New York Central & Hudson River Railroad, the Erie, the Lake Shore & Michigan Southern, the Grand Trunk and Great Western of Canada, and more recently, from the Buffalo, New York & Philadelphia, the Buffalo & Jamestown, and the Canada Southern.

About the first of May, last year, the Buffalo, New York & Philadelphia Railway was opened for the transaction of business. This is a fair subject for much congratulation by the residents along its route as well as those of its termini. It extends from Buffalo to Emporium, Pennsylvania, a distance of

121 miles, connecting at the latter point with the Philadelphia & Erie Division of the Pennsylvania Railroad, thus forming a direct line to Philadelphia, New York, Baltimore and Washington, and also to the bituminous and anthracite coal regions of Pennsylvania. New lines in connection with it have already been opened, or are in process of construction. One of them, known as the Jersey Shore, Pine Creek & Buffalo Railroad, will extend from Williamsport to Port Allegany, a station ninety-seven miles from Buffalo. This road, when completed, will make a direct connection with the Reading and New Jersey Central Roads, and form a shorter route to New York than by the New York Central, and by far the shortest line to Philadelphia. It will also make direct connections with the anthracite coal regions, and by forming a shorter line to the lakes than by any other route, must command a large share of the traffic in anthracite coal, which can be distributed by lake from this point at least fifty cents per ton less than from either Erie or Cleveland. Already the trade in groceries, provisions, dry goods, hardware, glass and crockery, paints, agricultural implements, machinery, etc., with dealers, farmers, manufacturers and residents along the road, has become of great importance, and as the population and resources increase the business relations of Buffalo must correspondingly receive the benefit.

Not only the products of the coal and iron mines of Pennsylvania, but also the iron and copper of the Lake Superior region, and the iron of the Lake Champlain district find a common center of receipt and distribution at Buffalo. The same may be said of the lumber of Michigan, Ohio, Canada and Pennsylvania. A portion of the slate brought to this port now comes from Lehigh, Northampton, and York counties, Pa., and some from the new quarries lately opened in the Lake Superior region of country; and a considerable trade is expected from these additions to the sources of supply.

The Buffalo & Jamestown Railway is now completed to Gowanda, and is doing a good local business. The means are substantially provided for its extension to Jamestown, where it will intersect the Atlantic & Great Western, and Dunkirk & Warren Roads.

The opening of the International Bridge from Black Rock, Buffalo, to Victoria (Fort Erie), Canada, took place on the third of November, 1873. The cost of this handsome iron structure was about $1,500,000 in gold. The total length, without the approaches, is 3,630 feet, or nearly three-fourths of a mile. The bridge has been leased by the Grand Trunk, the Great Western, the Canada Southern, the New York Central, and the Erie

Railways; and the Buffalo, New York & Philadelphia will also connect with it. Already an immense traffic passes over it, and other bridges or tunnels are projected.

The coal trade of Buffalo with the Western States received, last year, an immense impetus, the effect of which is yet only partially developed. The largest vessels navigating the lakes engaged in the grain trade come to Buffalo and require return cargoes of coal for ballast, preferring it to any other kind of heavy freight in consequence of the quick mode of handling it here by means of "chutes or pockets from trestle-work platforms," whereby a vessel of the greatest tonnage can be loaded in four or five hours. A schooner can receive a cargo of 1,200 tons of coal in four hours. This peculiar feature of the trade was brought prominently to the notice of the Senate Committee of the United States, appointed to investigate the subject of Transportation Routes to the Seaboard, when they visited our city last fall, and attracted their attention in a very marked manner.

For several years the coal trade has increased with marvelous rapidity, and scarcely any bounds can be assigned to its future development. In 1873 no less than 1,237,768 tons were received against 861,373 tons in 1872; an increase of 376,395 tons. The shipments by lake in 1873 were 570,443 tons, and by canal 68,210 tons. In 1861 a single company began the trade here in anthracite coal with 25,000 tons, and had much difficulty in disposing of it; last year the receipts of this kind of coal alone were 755,044 tons.

The trade in Western products is enormous. Last year Buffalo received from the West, by lake and the Grand Trunk Railway, 73,636,595 bushels of grain of all kinds, and by the Lake Shore Railroad, during the same period, 30,391,300 bushels, a grand total of over 104,000,000 bushels. The exports by the Erie Canal during the season, from Buffalo, were 50,722,156 bushels of grain; by railroads they were upwards of 51,000,000 bushels, for the year.

The receipts of lumber were on a similar scale of magnitude.

The number of elevators is thirty-one, with storage capacity of 7,215,000 bushels, and a transfer capacity of 2,715,000 bushels every twenty-four hours. To five of the elevators grain dryers are attached, capable of drying in the aggregate 80,000 bushels of corn every twenty-four hours. Last year 9,959 vessels, of the aggregate tonnage of 4,886,733, entered and cleared at the port. The total tonnage of the District of Buffalo Creek, June 30th, 1873, was 153,238, viz.: 38,547 sail, 7,484 iron steamers, 42,699 steam ves-

sels of all kinds, 3,065 barges and 61,441 canal boats. During the year sixty-three vessels were built and enrolled in this district.*

Last year there was a noteworthy increase in the number of malt-houses, which are now capable of malting 1,888,000 bushels of barley in one season. The location of Buffalo is peculiarly well adapted for the manufacture of malt; a cool climate, fine water and ready access to the best barley-growing districts of Canada, are some of its prominent characteristics. A new feature in distribution is now developed; the Buffalo, New York & Philadelphia Railroad carried malt for Newark, N. J., direct, and competed with the Northern Central Railroad for the Philadelphia and Baltimore trade.

The cattle-yards of Buffalo cover a surface of over fifty acres. Last year the increase of the business transacted in them was remarkable. The receipts of live stock were as follows: 409,738 cattle, 733,400 sheep, 1,662,500 hogs and 28,336 horses; in the aggregate 2,833,974 head, of the value of about $50,000,000. Yet the business is now increasing more rapidly than ever before. The supplies are brought from Canada and the Western States and Territories, including Texas, the Indian Territory, Colorado and Montana. The unrivaled advantages offered by the position of Buffalo are well improved by the facilities afforded for taking off and transferring the stock. Buyers congregate here from New York, Philadelphia, and other Pennsylvania cities, Albany, the chief points on the Hudson River and other places in the interior of the State, and also from the various New England States and New Jersey. In fifteen or twenty hours cattle, sheep, swine and horses can be taken from Buffalo to any of the three great leading places of their use or consumption, New York, Boston and Philadelphia. A street railway, already completed, connects the cattle-yards with the business center of the city.

The excellence of the position of Buffalo as a distributing point for manufactures, and for the reception of their materials, and her facilities for cheap fuel have already produced many of the results which might be expected from them. Numerous manufactures are conducted on a magnificent scale, and within the last year or two hundreds of new establishments have been begun, and thousands of new dwellings erected.

The banks of Buffalo have a capital and surplus of $3,268,000, and their resources, at the end of 1873, were $11,020,832. The number of depositors

* For further particulars of the trade of Buffalo, see the comprehensive reports of Mr. Thurstone, Secretary to the Board of Trade.

in the savings banks, on the first day of January, 1874, was 54,497; the amount due them was $15,243,439.63, an average to each depositor of $279.72. The total resources were $16,346,016.48.

The substantial character of our business was satisfactorily tested by the great financial panic of last autumn. If the citizens of Buffalo could have been so far separated from other people as to have known nothing of the depression and alarm prevalent elsewhere, there would not have been even an unusual ripple on the surface of our business affairs. At some of the banks, throughout the worst of the crisis, every one having just claims against them was given the amount in currency whenever he preferred that mode of payment. Several of them never ceased either to pay out currency or discount the notes of their customers nearly or quite as usual. There was no suspension among our banking institutions, except in the case of one private banker, and this was owing entirely to his holding large quantities of stocks. He soon resumed, after paying every creditor in full. The banks were considerate and liberal in making such discounts as would help the manufacturers to keep at work the men in their employ.

STREET AND AVENUE DIRECTORY.

EXPLANATION.

It will be noticed that in this Street Directory the names of the streets are set down in alphabetical order, giving the course which they run, according, as near as possible, to the points of the compass, and enumerating all streets which cross the same in the order in which they occur. The number on one corner has been given, so that a person wishing to find, say, 495 MAIN STREET, on consulting the Street Directory, finds that the right hand corner of Main and Mohawk is 487, consequently the place he seeks is only a few doors above.

The grounds, consisting of a whole block, fronting on Delaware avenue, and extending to a charming private park in the rear, are tastefully laid out and ornamented with trees and shrubbery.

The buildings, "The Cottage" and "Goodell Hall," combine all that is desirable in arrangement and convenience. The former is built of stone, and is exclusively occupied by the family of the principal, the young ladies entrusted to his care as boarders, and the teachers of the institution boarding with the principal. The latter, "Goodell Hall," has been expressly erected for academic instruction, and for spaciousness and convenience, may well challenge comparison with any similar establishment in the country. It has abundant accommodations for four hundred pupils. Rev. A. T. Chester, D. D., Principal.

All our instruments are built of the best and most thoroughly seasoned materials. Their tone is deep, round, full and mellow, the touch elastic. We were

AWARDED THE FIRST PREMIUM

at the New York State Fair, in 1862; also the First Premium at the International industrial Exhibition, Buffalo, in October, 1869 and 1871; and we claim the right of saying that our make of Pianos is superior to any manufactured in this country.

EXTRACTS FROM THE "ROCHESTER UNION."

MR. G. W. ELLIS—Dear Sir: I take much pleasure in saying that the Piano you furnished for Grau's Opera Troupe in this city, manufactured by Messrs. Kurtzman & Hinze, is a very fine instrument—indeed as good as I have ever used.

Yours truly,

E. MUSIO,
Musical Director of the Italian Opera.

TYPE FOUNDRY

N. LYMAN'S SONS, ... Proprietors.

36 and 38 WEST SENECA STREET.

By the completion of our new and powerful machines, we are now enabled to force metal into type (heretofore impossible) that will exceed in durability anything in the shape of Type now made in other places.

In case you need new Type for News or Book Work, we would advise you to give us your orders and you will be convinced, what we affirm, to be a fact.

If you let us know when you intend to renew your paper with type, and give us the size and quantity of type you use, we will hold ourselves ready to meet your wants with promptness.

ELECTROTYPING.

Printers will find it to their advantage to send their forms to be Electrotyped when large numbers are to be printed from them, thereby saving their type from wear. Also Books and Pamphlets Electrotyped as low as Stereotyping. Cuts, Borders and in fact anything that needs Electrotyping.

In consequence of the death of Mr. N. LYMAN, former proprietor of the BUFFALO TYPE FOUNDRY, the style and name of this Foundry will be hereafter, *N. LYMAN'S SONS, Type Founders, Buffalo, N. Y.*

In making this change, we must return thanks for the favors shown this Foundry in the past, and hope that your trade will be continued with us, and that you will *give us an opportunity* to please you, as it shall be our endeavor to do so to the best of our ability.

We can supply you with anything in our line *at rates as favorable* as any Foundry in this country, and material that is *not excelled for beauty and durability.*

Printing Presses and Printing Machinery of all makers furnished at short notice.

Also Type adapted for Dick's Mailing Machines. Printers and Publishers merely giving the number of subscribers, can have fonts put up suitable for same.

BUFFALO, MARCH 30th, 1870.

MESSRS. IRLBACKER & DAVIS,

Gentlemen:—I have the "Union Steam Heater," for which you are agents, in my house, and have used it for two years. I regard it as the most perfect heating apparatus with which I am acquainted. The atmosphere of my house is uniform, soft and pleasant, and it is always comfortable as summer. I regard it as an economical apparatus, as far as its consumption of fuel is concerned, and by its use we avoid the sudden and violent changes that are unavoidable in using any Hot Air Furnace that I have ever used or seen.

FRANK & CO.'S
PONY PLANER AND MATCHER

This Machine is designed to meet the wants of a large number of those who are in want of a Planer and Matcher, who either have not the means or sufficient amount of planing to afford a large and expensive machine. It is small, strong, compact and durable, occupying a space about 3½x6 feet. It has four 4¼ inch feed rollers, connected by expansion gears. Both the upper feed rollers and cutter head are raised at the same time by the use of a single crank. The under cutter head is raised and lowered by a screw, to give a light or heavy cut as may be desired. The pressure bar over the lower cutter head is raised by the use of a screw at each end, both being operated at the same time by bevel gears connecting with a horizontal shaft and crank. It will plane both sides, tongue and groove or joint both sides at the same time from 2½ to 12 inches wide, and do as much work as many machines costing double the price.

PRICES.—To plane and match 12 inch wide, $375; to plane both sides and match 12 inch wide, $450; extra cutters per pair, $4.

CO-OPERATIVE

MILK ASSOCIATION

No. 32 ELLICOTT STREET.

The above is an Association of Farmers, chartered under the laws of the State, for the purpose of furnishing milk directly to the consumer, the object being to avoid the ruinous commissions they have been obliged to pay for having their milk marketed under the old system, and to confer an equal benefit upon the consumer by furnishing a pure article.

The Association commenced business in this city May 1st, 1872, and after two year's warfare against the more than usual difficulties incident to a new business, has the satisfaction of announcing that it has become firmly established, and now ranks as one of the permanent institutions of Buffalo.

In case of any failure on the part of the distributing agents to deliver pure milk, or otherwise to fulfill their obligations to their patrons, notice should be immediately given at the office.

NOTICE TO THE TRADE

CONCERNING

JOHNSON'S

BUFF-TINTED COPYING PAPER

CHEAPEST AND BEST PAPER.

Circulars have been issued to the Stationery Trade, advertising our numerous customers as "unprincipled jobbers and dealers," and threatening them with prosecution, which are doubtless intended to intimidate them against purchasing or using

JOHNSON'S BUFF-TINTED COPYING PAPER

and have gone so far as to state that in some instances our paper has been represented to be another article, made by other parties.

We have bestowed years of labor in bringing our paper to its present perfection, and so far from having any desire to confound it with any other, have labored assiduously to preserve its identity with us.

It is our intention not to permit the trade to be intimidated in the purchase of our Paper. We are able to supply the market with a superior article, at less price than any other, and propose to do so.

If you buy any Copying Paper or Books made by us, we shall protect you against any loss by reason of prosecution or infringement upon the pretended rights of any manufacturer.

Every one of our Copying Books has pasted on the front inside cover a label, reading "JOHNSON'S BUFF-TINTED COPYING PAPER." Then follow a few lines setting forth the advantages of our Paper, with directions for copying, &c.

All our Books are done up in packages of one-quarter dozen each, with a label on the outside of package which reads, "Johnson's Buff-Tinted Copying Paper, Copying Books," size, number and thickness.

Our Buff-Tinted Copying Paper is done up in packages of two reams each, with label on the outside of each package as follows: "Johnson's Buff-Tinted Copying Paper." This label also contains a list of all the sizes of Paper we manufacture, with other instructions in regard to using this Paper, &c.

We have been somewhat particular in describing the manner in which our Paper and Copying Books are sent out to the trade, so that they may more readily identify them, and understand that we do not wish to confound them with any inferior article.

FROM THE SCIENCE OF HEALTH.

OPEN FIRES.—In every home there should be at least one open grate, or some other arrangement for burning wood or soft or hard coal. A fire which can be seen as well as felt—a cheerful, bright, blazing fire, with shovel and tongs, and fender too, if you please, which will attract the family by its social influences, is a grand thing in a home. Those black, grim, tartarean flues, filled with the stale odors of cellar, and hot air-chamber and seething water-tank, and emitting clouds of pulverized ashes to cover your furniture and stifle your lungs, are among the greatest banes of family enjoyment and comfort. It is all well enough to have one's dwelling warmed from top to bottom, and to have no coals to carry beyond the furnace, but this heating system has done immense mischief to the family powers, scattering the members of it all over the house, and furnishing not one attractive spot in which the inmates will gather, as by instinct they do, to enjoy the cheery comforts of the fireside. There is no fireside in most of our modern houses. There are only holes in the floor or in the walls. And we are disposed to think that the good ventilation of the open fire adds not a little to the unconscious blessings of its hospitable and domestic influences. The sight of the little folks, as they sit musing and amused while the wood fire burns, and watching the fantastic flames and the glowing coals, is worth many times the cost of that cord of hickory or oak at city prices; and a wise household would rather part with the furnace which that bright blaze supplements and atones for than with the low grate which makes the family circle a real thing. Try it, ye who can, and see if the moral, æsthetic and domestic power of this style of home comfort is over-estimated.—*The Science of Health.*

WHY ITS UNPARALLELED SUCCESS? BECAUSE,

It is the only truly National Company in the world. Purely Mutual.

The only Company which provides by its Charter for Department Boards of Trustees, and the only Company in whose constitution this important feature is organic and perpetual.

It is purely an Association of Department Constituencies, in which each Department has a direct voice in its general management.

It is a home Company in each locality where organized, with the strength of a National one; and it guarantees the investment of the re-insurance fund in the locality where the premiums are collected.

Its valuations are made upon the ultra conservative rate of *Four per cent. Interest.*

The advantageous features of its Policy Contracts, embodying the *Advance Dividend Plan*, whereby the Insured is guaranteed Twenty-five per cent. Dividend in advance, also the *Continued full insurance under lapsed policies.* Thus under this system a Ten Payment Life Policy for $10,000, on a life aged 40, at date of issue, two premiums having been paid, would continue in force for the full $10,000, 5 years, 217 days. If the Insured die during the period of the extension of the policy, the full amount of the Insurance will be Paid *without any deduction for Premiums or Interest.*

Holders of policies extended under this system have the right *during the first six months of the Extension*, to restore the policy, by paying up the arrear premium, with interest, *without a new Medical examination.*

SHINGLE, HEADING, STAVE AND SAW MILL

MACHINERY,

Self-Feeding, Self-Tilting, Self-Dogging.

Saws from 3,000 to 5,000 per Hour.

Patented April 17th, 1866.

OUR AUTOMATIC TWO-BLOCK MILL.

This is a machine which we unhesitatingly present to the public as the BEST TWO Mill in use. It is constructed entirely of iron and steel, and in a simple and manner. The advantages of this machine are: the LARGE QUANTITY OF WORK out, its QUALITY, and the SAVING OF LABOR,—one man tending it easily. The is so constructed that when one block is being sawed the other is receding. ATED ABOVE THE SAW, which is done by the tracks upon which the carriage runs raised and lowered by a simple arrangement not liable to get out of order. advantages are, that the saw will run LONGER WITHOUT REFILING, as the saw in contact with the block only when cutting. The block not coming in contact receding, the upper side of the saw is dulled no faster than the lower, a desidera- not accomplished in any other machine. Any one will readily see that the saw will uch longer before refiling, and also avoid making clipped shingles as in other ma- where one side of the saw becomes duller than the other. It has the advantage two block mills in using 40 inch saws instead of 48, and the carriage consequent- ring less distance to travel to cut the same width shingle.

is the self-acting tilting table operated by the movement of the carriage, and by the paul, you make as many shingles as you please one way, if desired.

ded the Silver Medal at the Ohio State Fair, Toledo, 1868. Awarded the Medal at the Michigan State Fair, Detroit, 1868. Awarded the Highest Pre- at International Industrial Exhibition, Buffalo, N. Y., 1869 and 1871.

e also manufacture Automatic One Block Shingle Machines, Hand Feed Shingle Shingle Machines, Wheel Jointers, Saw Jointers, Belting Machines, Drag Saws, Splitters, Wood Saw Tables, and Saw Mill Machinery, with the Latest Improve-

EXTRACT FROM THE OFFICIAL REPORT OF THE

JURY ON MUSICAL INSTRUMENTS

Exposition Universelle, Vienna, 1873.

"We regret that the celebrated Inaugurators of the new system in Piano-making, Messrs. STEINWAY & SONS, of New York, to whom the entire art of Piano-making is so greatly indebted, have not exhibited."

Letter from the celebrated Pianist and Composer ANTON RUBINSTEIN, being the only testimonial ever given by him to any Piano Manufacturer.

Messrs. STEINWAY & SONS, NEW YORK, May 24th, 1873.

GENTLEMEN:—On the eve of returning to Europe, I deem it my pleasant duty to express to you my most heartfelt thanks for all the kindness and courtesy you have shown me during my stay in the United States; but also, and above all, for your unrivaled pianofortes, which once more have done full justice to their world-wide reputation, both for excellence and capacity of enduring the severest trials. For during all my long and difficult journeys all over America, in a very inclement season, I used and have been enabled to use your pianos exclusively in my 215 concerts, and also in private, with the most eminent satisfaction and effect. Yours very truly, ANTON RUBINSTEIN.

STEINWAY & SONS' MAMMOTH MANUFACTORY is the most extensive establishment of its kind in the world.

EVERY PIANO WARRANTED FOR FIVE YEARS.

Prices as low as the exclusive use of the best materials and most thorough workmanship will permit. Old Pianos taken in exchange.
